## **DETAIL OF ACTION**

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371<sup>®</sup> of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 1-4 and 6 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Brockmeyer et al. (6,591,284).

Brockmeyer et al. discloses a traditional FFT by partition the FFT into three or more stages (see figure 7) which are calculated sequentially on a processor (see col. 1, 15-35). The

Art Unit: 2124

FFT are performed by computing radix-R butterflies in a block of N/R overlapping butterflies (block1 of stage 1, see figure 8)) in the first stage, computing radix-R butterflies in a fist block of N/R<sup>2</sup> overlapping butterflies (block1 of stage 2) of the result from the first stage, then computing radix-R butterflies in a second block of N/R<sup>2</sup> overlapping butterflies (block2 of stage 2) of the result from the first stage. In order to perform the calculations, the processor inherently has memory means for storing a sequence of data, and a full set of twiddle factors as the claimed first set, and any subset thereof can be seen as the claimed second set.

4. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Brockmeyer et al. (6,591,284).

Although Brockmeyer et al. does not discloses the FFT in radix-4, it would have been an obvious application to a person of ordinary skill in the art to apply the traditional FFT as disclosed by Brockmeyer et al to process FFT in radix-4. It is because FFT in radix-4 is well known in the art, and the traditional FFT as disclosed by Brockmeyer et al is well suitable for processing FFT in radix-4 which would reduce the processing time.

- 5. Applicant's arguments with respect to the have been considered but are moot in view of the new ground(s) of rejection.
- 6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 2124

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period; then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chuong D. Ngo whose telephone number is (703) 305-9764. The examiner can normally be reached on Monday-Friday from 7:30 AM to 6:00 PM.

The fax phone number for the organization where this application or proceeding is assigned are as follows:

(703) 746-7238	(After Final Communication)
(703) 746-7239	(Official Communication)
(703) 746-7240	(For Status inquiries, draft communication)

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 305-3900.
